

# Talking about FreeCom

What customers say about our pilot headsets

"Even after a 13-hour flight duty, FreeCom feels extremely natural and comfortable to wear."

Jason Gregory, Airbus Pilot, Jetstar Asia Airways

"In the past when I wore an ear-seal or ear-muff style headset, I would fly with my right hand while using my left to hold my headset on my head during loops. During a long flight or after a day of several shorter flights, my ears would also hurt from the pressure of the ear muffs pushing down on them. Now with the FreeCom 7000 I don't need to think about my headset at all."

Michael Sigrist, Acrobatic Pilot

"When you use the FreeCom, it's perfect because you have nothing on your head. It's small, it's lightweight, you can use a helmet (or not), wear sunglasses, none of it's a problem."

Alex Itin, Helicopter Pilot, Fuchs Helicopter

"I'm very impressed with FreeCom's comfort. It has outstanding clarity of communication and I love how its ambient features work; I really feel like I have natural hearing even with the FreeCom ear shells in my ears!"

Dominik Guler, Private Light Aircraft Pilot, Skyguide

"I was able to try out FreeCom and I'm not going to give it back..."

Bruno Müller, flight instructor and four-time reigning Swiss aerobatic flying champion, Flying Ranch AG

"FreeCom is very comfortable to wear and the flying experience is so much quieter than before. With the previous headset I used, I found it put too much pressure on the ears, which would make my ears hurt and give me headaches. That's not the case with the FreeCom's in-ear shells."

Florian Kuhn, Private Jet Pilot
